C#, Java, Python, C++, HTML, CSS, JavaScript, SQL, PHP, Lua

Tools & Frameworks

Git, .Net Core, TFS, jQuery, Bootstrap, Unity Game Engine, OpenGL, AWS, Openstack, WordPress CMS, Corona SDK, Agile, Visual Studio, MS Office

Education

McMaster University

Hamilton, On
Graduating April 2019

- Enrolled in final year of Bachelor of Applied Science in Computer Science with co-op
- Currently maintaining a 3.70/4.0 GPA, (an A-)
- **Relevant course work:** Data Structures and Algorithms, Software Requirements & Design, Databases, Computer Graphics
- Computer Science Society Executive - Vice President of Technologies Fall 2016 – Winter 2017

Software Projects

Good Life Index Project

Java, Project Leader/
Back End Developer

A web application allowing users to search for cities in the US and retrieve relevant statistical information creating a score for each city based on the city's crime rate. Worked collaboratively with a team of 5 members, employing Git version control and effective communication skills

Target Crisis

C++, OpenGL

An on-rails shooter inspired by Time Crisis. Development team of 4. Implemented texturing, lighting, ray-picking, sphere hit detection, Fog, Artificial Intelligence, and a HUD for the player.

Terrain Generator

C++, OpenGL

A graphics program using C++ & OpenGL to produce and display an interactive terrain mesh. Implemented Flat shading and Gouraud shading. Terrain can be generated by several different algorithms. Multiple modes for displaying terrain: wireframe, with lighting & shading, and hypsometric.

Additional Work

- Shipping and Receiving, Terra Greenhouses
- General Laborer, Homes by John Bruce Robinson

Summers of 2015-2016
